

How to improve my vocabulary?

How can I remember words?

The simple answer is to **USE** the words *several times* soon after you note them down. If you don't use them, you will forget most of them.

After you say or write the words, you will get a reaction from other people (or your teacher). That reaction will tell you if you have used the words correctly.

There are other ways to help your memory, too. For example, look at this list of words:

package tour
gorgeous
get promoted
fashionable
go sightseeing
athletic
check-in
secretary

It is challenging to remember a random list. So, how about putting these new words into categories?

Travel: *package tour, go sightseeing, check-in*

Jobs: *get promoted, secretary*

Appearance: *gorgeous, fashionable, athletic*

Even better, how about having a special page for each category in your vocabulary notebook? Here's an example:

Jobs

 secretary (n.)	 mechanic (n.)	 dentist (n.)
 get promoted (v.)	 to be interviewed (v.)	

Later on, you can add new words (and pictures) to the same page.
